Books Important for OT in NT Research

Computer has Logos Gold and Bible-Works7. Between these programs, you have all Hebrew, Greek, Aramaic, and Latin texts and Syriac NT, most of which have accompanying English translation. (These are not critical editions, however.) Both Logos and BW7 have tools for identifying OT/NT relations such as TSK. Both have Tov's *Parallel Hebrew/Greek*, but BW7 has a better implementation of it. Both have the older Charles' version of the *OT Pseudepigrapha*. (Charlesworth is better.) Use BW7 for Apostolic Fathers, Josephus, and Philo. Logos has NagHammadi texts and also a fully searchable ANF/N&PNF.
